## LabExact® Cotton Cloth IPA Wipes

LabExact® Cotton Cloth IPA Wipes are a highly durable woven cotton fabric saturated with 70% IPA.

Excellent “lay-flat” characteristics. Reduced pull, tear and bunch on rough surfaces. Much thicker, wetter and more durable than synthetic non-woven veil materials. 100% high purity, 3x rinsed virgin cotton cloth – similar to that of a handkerchief or bed-sheet. 400 thread count.

Wetted sufficiently for effective use in tables, counters, carts, fixtures, door handles and equipment.

70% isopropyl alcohol meets major health and regulatory agency recommendation for concentration strength.

6x6 inch (15.2 x 15.2 cm) dimension ideal for full hand coverage in wiping.

80 wipes per container, each easily removed with gloved hand.

Environmentally safe – Cotton is 100% biodegradable and incinerates cleanly.

No dyes, ammonia, bleach or fragrance added.

Gasket seal lid prolongs product life between usages.

Custom configurations and OEM are available.

I.W. Tremont is a trusted analytical and technical materials supplier founded in 1979.

Proudly manufactured in the U.S.A.

Important: Non-Sterile, not intended for use in applications of direct patient skin contact as antiseptic or as a high level medical device disinfectant. Professional use, not intended or labeled for retail consumer sale.
